

BY-NAME LIST

- Community does not use a Common Assessment Tool and has not begun to develop a by-name list
- The entire community uses the same Common Assessment Tool
- Community has begun to aggregate the names / data from the agencies that use the CAT but don't yet have a comprehensive list
- Community has a database to keep track of the names / data from the CAT but access is limited to certain parties

- A portion of the community uses the same Common Assessment Tool but several or many agencies are not participating
- Only a % of CoC's geography covered routinely by outreach workers
- Community has begun to aggregate the names / data from the agencies that use the CAT

- The entire community uses the same Common Assessment Tool
- Community has aggregated the names / data from the agencies that use the CAT and have a comprehensive list
- Community has a database to keep track of the names / data from the CAT and access is available to all parties
- Community meets very regularly, ideally weekly, to discuss (i.e. case-conference) the by-name list
- Community minimizes duplication of outreach efforts in each geographic area
- Broader community knows who to contact if they see someone who is homeless
- Minimal time passes between someone becoming homeless and becoming known to the community

- The entire community uses the same Common Assessment Tool
- Community has aggregated the names / data from the agencies that use the CAT and are nearing a comprehensive list
- Community has a database to keep track of the names / data from the CAT and access is available to all parties
- Community meets every once in a while to discuss (i.e. case-conference) the by-name list
